To Whom It May Concern:

Recently, Faith Community Hospital was selected to undergo an audit of our stage one meaningful use attestation. The audit was performed by a CMS contractor in New York.

Our first reaction was panic as we have gone through significant changes since the early attestation by the hospital and was fearful of not being able to provide adequate documentation backing up our claim.

I immediately contacted Jim Tate as I recognized him as a leader, author and advocate of the EHR/EMR program required by the government. Jim's knowledge and comprehensive study on the requirements set forth by CMS were instrumental in helping us achieve a favorable outcome in the audit. Jim is also personally known by the auditing firm contracted by CMS which proved to be invaluable with the interpretation of the guidelines.

I highly recommend Jim Tate and his services to assist with any EHR/EMR issue facing a health care provider. Please do not hesitate to call should you need further information on how we successfully completed the audit with Jim's help.

Sincerely,

Frank L. Beaman, CEO
